Work Experience

Lead Software Developer *Jul 2026 – Sept 2026*

Equilife Medical Equipments, Supplies & Services Inc. Project-based, Philippines

- Led design and delivery of ATLAS, an offline-first enterprise operations platform of ten integrated modules spanning ERP, inventory and asset management, logistics and warehouse management, and billing and revenue.
- Engineered the platform's AI layer, integrating OCR-based document intelligence for automated receipt and invoice extraction, a retrieval-augmented generation (RAG) pipeline over engineering manuals for fault diagnosis on defective equipment, and predictive analytics for demand and maintenance forecasting.
- Reduced routine operational tasks from roughly 2 hours to under 10 minutes, an 88% cycle-time reduction that lifted throughput by 80%, and eliminated six figures in annual losses from tracking errors, stock discrepancies, and unaccounted equipment through real-time asset visibility, audit trails, and dashboards.

AI Engineering Intern *Jun 2026 – Jul 2026*

NMBLR AI Foundry Salcedo, Makati City

- Executed structured testing and evaluation cycles for Forge, the company's core AI technology, and supported the NMBLR+ engineering team in building, testing, and deploying complex model integrations.
- Built NMBLR Rewards for Forge, a reusable enterprise rewards system architecture deployable across large consumer brands such as Jollibee, reducing per-client implementation effort through configurable components.
- Developed an AI agent kit for DEVCON that automates operations and engineering workflows, implementing a two-layer core and adapter architecture that streamlined the deployment lifecycle by 50% efficiency.

Full Stack Development Intern *Sept 2025 – Apr 2026*

DEVCON Philippines Ortigas, Pasig City

- Accelerated design-to-prototype velocity by 40% by architecting an AI-automated workflow with Claude Code, Google Stitch, and Figma to build the design system for DEVCON+, a centralized hub for 11 nationwide chapters.
- Developed responsive single-page applications and translated Figma designs into custom WordPress architecture, optimizing the CMS codebase, database schemas, and SEO infrastructure for organic rankings and load speed.

UI/UX Intern *Jul 2025 – Oct 2025*

Easybus PH Inc. Diliman, Quezon City

- Designed and optimized UI/UX prototypes in Figma for EasyBus' partner platforms such as Ohayami Trans Bus Terminal, DLTB Co., and Raymond, enhancing usability and customer booking flow.
- Published and maintained the official Ohayami Trans Bus Terminal, DLTB Co., and Raymond websites using WordPress + Elementor, improving online accessibility for 5,000+ monthly commuters.

Founder & Chief Executive Officer *Mar 2026 – Present*

Wika PH Manila, Philippines

- Founded and scaled an AI-powered language-learning EdTech platform teaching 10+ regional Filipino languages, architecting a cross-platform React Native Expo application with a Supabase backend.
- Built Dialecto, a Philippine-language conversational AI, into the product and grew the beta community to 280+ signups and testers, directing a cross-functional squad of 6 software engineers and product designers.
- Established institutional partnerships with government offices, including the Romblon Provincial Office, to validate regional language content and expand public sector adoption.

Technical Skills

Tech Stack: React, React Native, NextJS, Express, NodeJS, HTML, CSS, JavaScript, TypeScript, Python, PostgreSQL, Supabase, LLM integration, prompt engineering, agentic workflows, RAG pipelines, OCR document extraction, predictive analytics, Claude Code, CI/CD
Designing: Figma, WordPress, Elementor, Brizy, Webflow, Framer, Adobe Creative Suite

Projects

Wika PH *Mar 2026 – Present*

React Native Expo, TypeScript, Cartesia, Supabase Live on the App Store - wikaph.com

- Released a cross-platform language-learning application on the iOS App Store with 280+ signups and testers, delivering structured courses in five Philippine languages and Dialecto, a conversational AI companion built on Cartesia for real-time speech practice, supported by a personalized learning loop and gamified progression.

ATLAS by Equilife Medical *Jul 2026 – Sept 2026*

Next.js, TypeScript, TailwindCSS, PostgreSQL, Supabase, RAG, OCR, PWA Lead Software Developer

- Architected an offline-first Progressive Web Application across ten operational modules, engineering a normalized PostgreSQL schema, REST API layer, role-based access control, and conflict-safe offline sync.
