WORK EXPERIENCE

Software Developer | KPVE PTY LTD - Remote, Australia

June 2026 – Dec 2026

- Delivered end-to-end web and mobile products for Australian enterprises, including Sonic Healthcare, SDA Rentals, Doc On Call, and the corporate KPVE website, covering UI/UX design through production.
- Engineered robust, client-facing applications with modular, clean-code architectures and AI-assisted development workflows, accelerating full stack feature deployment velocity by 35%.

AI Engineering Intern | NMBLR AI Foundry – Ortigas, Pasig City

June 2026 – July 2027

- Executed structured testing and evaluation cycles for Forge, the company's core AI technology, and supported the NMBLR+ engineering team in building, testing, and deploying complex model integrations.
- Engineered enterprise-grade automated AI workflows and interactive data dashboards leveraging Claude Code for rapid LLM context injection, accelerating multi-agent orchestration pipelines.

Product Designer | DEVCON Philippines – Ortigas, Pasig City

Jan 2026 – Apr 2026

- Accelerated design-to-prototype velocity by 40% and optimized cross-platform performance with DEVCON+, event membership platform across 11 nationwide chapters by architecting a high-fidelity Figma design system and launching a Claude Code and Supabase-powered PWA prototype.
- Engineered a scalable user experience by translating high-fidelity Figma user interface designs directly into custom WordPress architecture, optimizing the core CMS codebase, relational database schemas, and SEO infrastructure to boost organic search rankings and platform load speeds.

Full Stack Development Intern | DEVCON Philippines – Ortigas, Pasig City

Sept 2025 – Dec 2026

- Pioneered the Caffeine AI ecosystem in the Philippines by engineering dApps on the Internet Computer Protocol (ICP) to accelerate deployment cycles, while spearheading the inaugural Caffeine AI Manila Hackathon for 200+ participants and 300+ total attendees.
- Developed high-fidelity, responsive single-page applications and web prototypes by integrating advanced LLM workflows like Claude Code and Caffeine AI, reducing interface development lifecycle durations by 35% across the organization's user-facing web infrastructure.

UI/UX Intern | Easybus PH Inc. - Diliman, Quezon City

Jul 2025 - Oct 2025

- Designed and optimized UI/UX prototypes in Figma for EasyBus partner platforms such as Ohayami Trans Bus Terminal, DLTB Co., and Raymond, enhancing usability and customer booking flow.
- Published and maintained the official Ohayami Trans Bus Terminal, DLTB Co., and Raymond websites using WordPress + Elementor, improving online accessibility for 5,000+ monthly commuters.

Digital and Social Media Operations Intern | Globe Telecom Inc. - BGC, Taguig City

Apr 2025 – Jul 2025

- Developed social media cards and key visuals for GlobeICON and Globe of Good under Globe Telecom, contributing to content viewed by over 300,000+ followers across Globe's various social media platforms, while conducting user and company research to support business strategy alignment.

Junior Graphic Designer | Widustalk Academy – Ortigas, Pasig City

Feb 2023 – Aug 2023

- Designed 10+ digital and print design assets weekly for four brands (Lingoloco Academy, Bobjo, Mango Rush, and Bueno Barber Shop), enhancing visual consistency and engagement across social media platforms with a combined reach of 9,000+ followers.

Founder & Chief Executive Officer | Wika PH

Mar 2026 – Present

- Founded and scaled a nationwide and international language-learning EdTech startup to teach regional Filipino languages by architecting a high-performance mobile application using React Native Expo.
- Directs an agile cross-functional squad of 6 software engineers and product designers, optimizing CI/CD deployment pipelines to accelerate feature rollout schedules and support concurrent global user traffic.

LEADERSHIP EXPERIENCE

President / Chapter Organizer | Google Developer Group on Campus - TUP Manila

July 2025 - Jun 2026

- Organized and facilitated hands-on workshops, talks, and hackathons in collaboration with Google technologies (e.g., Firebase, Flutter, Gemini), resulting in over 500 cumulative student learning

hours and increased tech adoption for 300+ students while managing a board of 100+ executives and leads.

Vice President of Technology | DEVCON Manila Chapter

Jan 2026 - Present

- Architected and scaled scalable digital platforms and specialized product infrastructure designed to optimize operations for nationwide volunteer networks and event management systems. Partnered with regional program leads to deploy high-impact technical initiatives in AI and Blockchain.

Head of Creatives | DEVCON Manila Chapter

Mar 2025 – Dec 2025

- Drove a 63.64% surge in initial social media engagement by architecting and deploying a modernized visual identity and cohesive branding framework across digital channels. Directed the creative pipeline and asset distribution strategy to establish high-impact brand recognition.

Vice Governor | College of Science Student Council – TUP USG Manila

Jun 2024 – July 2025

- Served student-centered governance and university initiatives impacting the 1,500+ College of Science students, driving a 5.4% increase in content engagement through 5+ major key programs while guiding a team of 51 student council members, boosting student-led events productivity by 300%.

Creatives & Branding Lead | Google Developer Students Club - TUP Manila

Aug 2023 – May 2024

- Directed the creative vision and multi-platform brand strategy for three major technology events, managing the production of over 20 distinct digital assets, slide decks, and marketing posters. Standardized design workflows to enforce absolute visual consistency.

Chairperson | Google Study Jam 2026: Dream, Design, Develop!

Feb 2026 – Mar 2026

- Spearheaded the technical program and operational execution of a Google technologies workshop that trained 70 attendees on modern product development pipelines, guiding participants from product requirement documentation in NotebookLM, through interface design using Google Stitch, to final frontend development leveraging Flutter MCP.

Chairperson | UI/UX Hawk-A-Thon 2025: Designing The Future

Feb 2025 – Mar 2025

- Spearheaded the end-to-end execution of a large-scale UI/UX hackathon, coordinating comprehensive educational program tracks that engaged 89 active university participants. Scaled student design proficiency in Figma and drove measurable awareness of Sustainable Development Goals (SDGs).

TECHNICAL SKILLS AND PROJECTS

Development: React | React Native | NextJS | Express | NodeJS | HTML / CSS / JavaScript | TypeScript | PostgreSQL | Python | LLM integration | Prompt Engineering | Agentic Workflows | RAG Pipelines | Claude Code | CI/CD

Designing: Figma | WordPress, Elementor, Brizy | Adobe Creative Suite | Canva

ATLAS by Equilife Medical | NextJS, TypeScript, TailwindCSS, Supabase, PowerSync

Jul 2026

- Architected an enterprise operations platform that digitalizes and automates end-to-end company processes, engineering, accounting, a modular architecture with a normalized relational schema, REST API layer, and role-based access control that replaces manual, paper-driven workflows.

Wika PH | React Native Expo, TypeScript, Supabase | Developer Camp Manila 2026 - 1st Runner Up

Mar 2026

- Engineered a functional AI-driven Philippine language-learning mobile application used by 250+ beta testers, integrating Cartesia to deliver a real-time conversational AI tutor while training a custom model on regional Philippine datasets to bridge linguistic gaps in standard LLMs.

DEVCON+ | React Vite, TypeScript, TailwindCSS, Supabase, Figma, Google Stitch, KPM, Claude Code

Mar 2026

- Architected a unified community hub for 11 DEVCON chapters by evolving a React and Supabase R&D prototype into a production-ready Progressive Web Application (PWA), leveraging an AI-automated Google Stitch workflow and Claude Code to achieve shared business logic while accelerating design-to-prototype velocity.

LogMark AI | React, TypeScript, Flask, Python, Claude, Selenium

May 2026

- Automated a high-focus digital social media bookmark management platform from scratch, eliminating the social media bookmark stalls by engineering an AI-powered data processing pipeline and a minimalist, swipe-based Spotlight interface that distills chaotic cross-platform saves into a single-focus stream of actionable text.

Eclipse | Godot, GDScript | Global Game Jam 2026 - Most Fun Game (Major Award)

Feb 2026

- Developed a high-speed 2D movement platformer from scratch in 48 hours, winning the "Most Fun Game" award by developing a complex dual-state physics engine that allowed players to toggle seamlessly between weightless and grounded movement states.

Centro NextJS, TypeScript, TailwindCSS, Supabase	Feb 2026
Engineered a comprehensive property management SaaS that unified residential, administrative, and security operations into a single interface, utilizing Supabase for real-time data synchronization and role-based access control for subdivisions, condominiums, and barangay administration.	
WarmApp Python, PyNum, YOLOv8, RoboFlow	Dec 2025
Developed a real-time computer vision fitness assistant from scratch using YOLOv8 and Roboflow, achieving high-accuracy form tracking for complex calisthenic exercises by training a custom object-detection model on thousands of augmented skeletal posture frames to capture precise joint positions dynamically.	
Sinag React Vite, TypeScript, TailwindCSS, Gemini, Flask, ThirdWeb Meralco IDOL Hackathon 2025	Nov 2025
An AI and blockchain-powered rewards system for saving electricity, building the React Vite and Tailwind CSS frontend, Gemini and OCR Flask backend to convert Meralco billing data into consumption insights for points redeemed in a rewards ecosystem engineered with Thirdweb and Polygon to mint tamper-proof tokens for verified savings.	
Kolehiyo React Vite, TypeScript, TailwindCSS, NodeJS, Express, PostgreSQL, Supabase	Oct 2025
Developed a centralized college and scholarship application tracker, by designing the UI in Figma, building the front end with React Vite and Tailwind CSS, and initializing the backend with Node.js, Express, and PostgreSQL, improving application tracking efficiency by 60% through a unified, responsive platform.	
Surebin Flutterflow, Firebase FFDG Hackfest 2024	Nov 2024
Optimized local waste management logistics and reduced community disposal friction by developing a high-performance cross-platform mobile application using FlutterFlow. The technical architecture streamlines community scheduling coordination to maximize environmental accountability.	
XorBin Arduino, Packetworx - NCR Finalist Top 4	Jun 2024
Automated materials classification and processing for urban recycling infrastructure by engineering an IoT-enabled smart bin utilizing Arduino microcontrollers and Packetworx network architecture. The hardware system integrates automated sensor arrays to sort and shred metal, plastic, and paper, while triggering real-time, automated SMS data alerts to optimize municipal collection cycles.	
BEEU Figma StartupQC 2024 Student Batch 1 - Bronze Awardee	May 2024
Accelerated academic nutritional research workflows by prototyping a high-fidelity mobile interface in Figma that yields instant visualization of complex macronutrient breakdowns per food item. The user-centric system architecture emphasizes intuitive data visualization.	

CERTIFICATES AND ACHIEVEMENTS

1st Runner Up - Wika Developer Camp Manila 2026	2026
Most Fun Game - Major Award Global Game Jam 2026 - CIIT	2026
Certificate of Recognition – Hackathon Judge DLSU-D SIKAPTala Hackathon	2026
Certificate of Recognition – Journey Talk Speaker GDGoC - PLM General Assembly	2026
Certificate of Recognition – Game Development Speaker PUP The Programmers Guild Unlock()	2025
Certificate of Recognition – Artificial Intelligence Resource Speaker JRU AI Am Ready Seminar	2025
Certificate of Recognition – Artificial Intelligence Resource Speaker EARIST COMSA Seminar 2025	2025
Certificate of Recognition - Ideathon Judge PUP Software Engineering Day 2025	2025
Certificate of Recognition - Game Development Speaker DEVCON Manila Game On Game Jam!	2025
Champion - Aral Arcade Game Jam Kwentoan & Indie Games Group Philippines	2025
Champion – Logo Making Contest YWCA Philippines: Period Positive Project	2025
NCR Finalist – Top 4 Packethacks 2024 IoT NCR	2024
Bronze Awardee StartUp QC 2024 Student Competition	

EDUCATION

Technological University of the Philippines - Manila Bachelor of Science in Computer Science	2027
Academic Achiever - Dean’s Lister CHED-NCR - StuFAPs CMSP Scholar YMCA Manila – Scholarship Recipient	

Related Coursework: Software Engineering, Data Analytics, Object-Oriented Programming, Artificial Intelligence, Data Structures
